

Place, Home, & Housing

Health & Social Care Integration
– The Occupational Therapy Contribution

objectives

Overall aim- To be able to understand the work across different areas in Scotland – in terms of what models and principles have been developed/identified.....

- To examine how this work has been developed within the context of the broader strategic framework of integrated locality services, and what other work requires to be undertaken to support this;
- To examine and address challenges to implementing OT service models which can be applied 'upstream', providing a clear emphasis on a personal outcomes approach, focusing on prevention, early intervention and anticipatory care.
- To examine and consider how we can work together to identify the core skill sets, interventions, and competencies required to deliver an effective outcomes focussed occupational therapy contribution to health and social care.

Place, Home, and Housing

.....Supporting Occupational Therapy services

- Supporting strategic approaches...
- Linkages with other PHH work – *Adapting for Change, Community equipment.....*
- Challenging.....
 - structural approaches
 - 'specialisms'
 - evidencing Outcomes/performance
- Capturing and sharing learning, tools, models, ideas....
- Facilitating discussion.... with wider stakeholders

Workshop sessions

- **Topics -**

- 1. *Strategic focus for effective use of OT resources (Glenallan) ;*
- 2. *Outcomes and Performance (Strathallan – main room);*
- 3. *Core roles & workforce development (MacLeod)*
- **Participation** – delegates will attend each workshop. Workshops have been allocated to ensure each partnership reps are spread across different sessions at any one time.
- **Timings** - 40 mins for each Workshop.
- **Feedback** – whole group discussion at end highlighting key themes

Summary & next steps....

- **Capturing & sharing learning from session with wide range of stakeholders**
- **...what will your next steps be...?**
