

Older People/Acute Adult Hospital at Home

Progress update September 2024

Hospital at Home (H@H)

is a short-term, targeted intervention providing acute level hospital care in an **individual's own home** or homely setting.¹

Older people/acute adult Hospital at home:

- has **high satisfaction** and patient preference across a range of measures¹
- reduces pressure on unscheduled acute care in hospitals by **avoiding admissions** and **accelerating discharge**, and¹
- has consistent evidence of **lower costs** compared to inpatient care.¹

What we do

Develop resilience of services: Support NHS boards/HSCPs to improve the resilience and maturity of their H@H services.

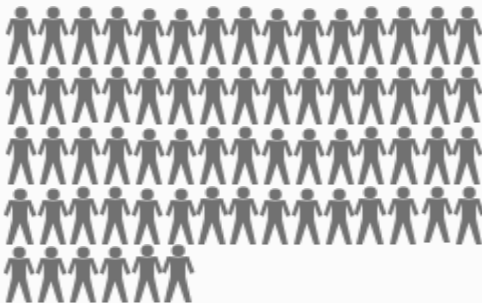

Develop new H@H services: Support NHS boards/HSCPs to implement new older people/acute adult H@H services.

Identify opportunities for technology: Evaluate the impact that point of care testing has on the delivery of H@H

National Learning System: Enable older people/acute adult H@H services to share and learn from each other.

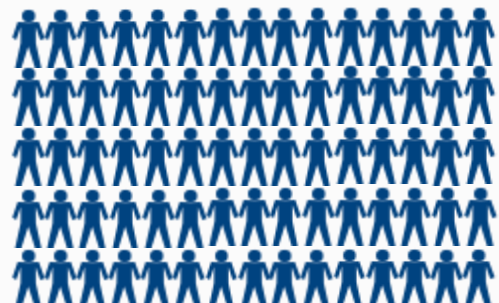

Impact this quarter...

Almost 14% increase in patients managed by hospital at home services²

3596 patients were managed by H@H services from July to September 2023

compared to...

4082 patients were managed by H@H services from July to September 2024

H@H services prevented over 4,000 people spending time in hospital during July to September 2024, relieving pressure from A&E and the Scottish Ambulance Service.

Delivering patient centred care³

"Their care is exemplary, and I would like to see more teams in the scheme"

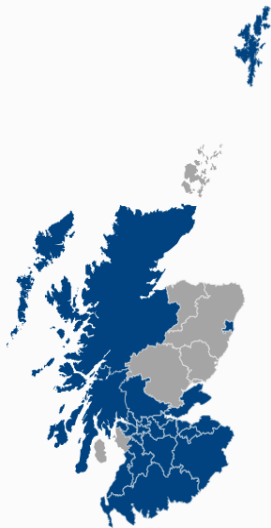

Patient supported by H@H Northern Sector

"This kind of initiative is exactly the way care should be given when possible"

Patient supported by Lanarkshire's Hospital at Home Service

This has been achieved by...

Working with 13 NHS boards across Scotland

We are working with services across 13 NHS boards to create new services, improve the resilience of existing services and evaluate new ways of working.

Growing capacity to be bigger than UH Wishaw⁴

Victoria Hospital
539 beds

Royal Alexandra Hospital
534 beds

Hospital at Home, Scotland
510 equivalent beds

University Hospital Wishaw
491 beds

University Hospital Hairmyres
453 beds

In September 2024, there was the equivalent of 510 beds with an occupancy rate of 80%. This is similar to the size of Royal Alexandra Hospital and larger than University Hospital Wishaw.

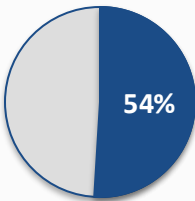

Expanding services

NHS Dumfries and Galloway have progressed beyond a pilot phase and introduced admission avoidance in July 2024

NHS Western Isles are expanding their service to the Southern Isles and have seen their first patient on Uist

NHS Shetland preparing to launch in Quarter 3 of 2024/25

Point of Care Testing (POCT)

NHS Lanarkshire is trialling point of care testing technology (POCT). Early findings suggests it has helped with **faster decision making in 54% of cases.**

Our work will capture the potential benefits and practical implications of POCT with several services throughout Scotland.

Sharing Learning

Save the date for the **National Older People/Acute Adult H@H Event** taking place on Wednesday 5 March 2025

H@H network sessions commence on Thursday 12 December 2024

Providing advice and guidance

“Advice and input from the team has been invaluable in providing support and guidance during the early stages of development for our service. We are extremely grateful that this resource is available”

Service Lead, NHS Shetland
