

## Rainbow

*Your smile is sweet, and yet there's more  
It tell's me something, of that I'm sure  
Like an arc of colour across the sky  
A rainbow, the question why  
To show the world that once again  
The sun has come out to replace the rain  
Sometimes we're sad, but that's alright  
It helps us grow stronger, it helps us to fight  
And like a rainbow, if we bring out a smile  
It makes us feel better, maybe just for a while  
But each day as we smile just a little more  
We'll be more happy than sad, and that's for sure  
So bring out the sunshine with your smile so bright  
Both sunshine and rainbow a wonderful sight*
