

SPSP Mental Health

Learning System Webinar: Improving Observation Practice – Policy to Practice

Thank you for joining: this event will begin at 13.00
In the meantime, please introduce yourself in the chat.

@SPSP_MH
#SPSPMH

Welcome and introduction

Dr Jane Cheeseman

National Clinical Lead

Healthcare Improvement Scotland

Housekeeping

During the meeting please have your microphone on mute and video turned off. This will avoid distraction and minimise the likelihood of slowing down the technology.

There will be opportunities for Q&A in the planned session. Please pop all questions in the chat box

Some of this session will be recorded.

If you require any technical support please pop in the chat box or contact his.pspcontact@nhs.scot.

Aims of the session

Healthcare
Improvement
Scotland

- Overview of SPSP
- Overview of SPSP MH
- A practical example of how the 'From Observation to Intervention' guidance is being implemented

Scottish Patient Safety Programme: Update

Joanne Matthews

Head of Improvement Support and Safety
Healthcare Improvement Scotland

The Programme

**SPSP aims to improve
the safety and reliability
of care and reduce harm**

Core Themes

Essentials of Safe Care

**SPSP Programme improvement focus
Maternity ,Neonatal, Paediatric ,Acute Care,
Primary Care, Medicines and Mental Health**

SPSP Learning System

The Essentials of Safe Care

Healthcare
Improvement
Scotland

Aim

**To enable the delivery
of Safe Care for every
person within every
system every time**

Primary Drivers

Person centred systems and behaviours are embedded and support safety for everyone

Safe communications within and between teams

Leadership to promote a culture of safety at all levels

Safe consistent clinical and care processes across health and social care settings

Secondary Drivers

Structures & processes that enable safe, person centred care

Inclusion and involvement

Workforce capacity and capability

Skills : appropriate language, format and content

Practice : use of standardised tools for communication

Critical Situations : management of communication in different situations

Psychological safety

Staff wellbeing

System for learning

Reliable implementation of Standard Infection Prevention and Control Precautions (SICPS)

Safe Staffing

Essentials of Safe Care

Improvement Collaborative

Safety Climate Measurement

Learning System

Learning System

The **SPSP Learning System** will be a key element of our work and underpins all our activities. It aims to accelerate sharing of learning and improvement work through a range of engagement and learning opportunities.

Webinar Series 2022

Improving Observation Practice – Policy to Practice

21 March 2022, 1pm

Safety climate – What is safety climate and why is it important

16 June 2022, 1pm

Webinar 3 – Tbd

September 2022

Producing
evidence
summaries and
case studies

Case Studies 2022

NHS Lothian: Improving Observation Practice – Policy to Practice

The State Hospital: [Using the Essential of Safe Care to understand your system](#)

The State Hospital: Implementing Clinical and Support Services Operating Procedure

What would you like the topic of our 3rd learning system webinar to be?

- a) Essentials of Safe Care: Creating the conditions for safe care
- b) Learning from covid: an inpatient perspective
- c) Substance use in inpatient mental health

Or share your ideas in the chat.
Begin your idea with **W3**:

The following section of the webinar will be recorded.

If you don't want to be included in the recording, please ensure your camera is off

Improving Observation Practice in NHS Lothian

From Policy to Practice

Jenny Revel
Clinical Academic Mental Health Nurse,
Royal Edinburgh Hospital

Background

Healthcare
Improvement
Scotland

- 'Observation' is the practice of increasing the ratio and proximity of staff in response to heightened risk in inpatient settings
- Most often for self-harm, violence and aggression, disinhibition
- Practice of observation bound up in culture
- Can be stigmatising, punitive, dehumanising
- Relationship with patient safety not clear

Drivers for Change

Healthcare
Improvement
Scotland

- Change attempted in 2002 with CRAG
- Mental Welfare Commission for Scotland reports 2012/13
- Scottish Government attention
- Local SAEs
- Publication of Healthcare Improvement Scotland guidance in 2019

Creating conditions for change

Healthcare
Improvement
Scotland

- Setting up steering group
- Senior leadership support
- Becoming multi-disciplinary
- Awareness sessions (ethos, changing language)
- Involvement by patient representative groups

Q. How do you take a national guidance document and translate it into a policy that works on the ground?

- Understand the system
- Reflected on problems
- Tap into context in which decisions around observation are made (high risks, blame, accountability)
- Ask staff, and ask again

- Encourage person-centredness, creativity, flexibility
- Prevent missed opportunities, surveillance, entrapment, loss of skills
- develop a policy that permits flexible models and provide organisational permission for thinking differently
- develop processes that support decision-making in the context of high levels of risk

REAS CI Standard Operating Procedure

Ethos:
Flexibility
Least restrictive
Multidisciplinary
Intervention focused
Purposeful

SOP Document

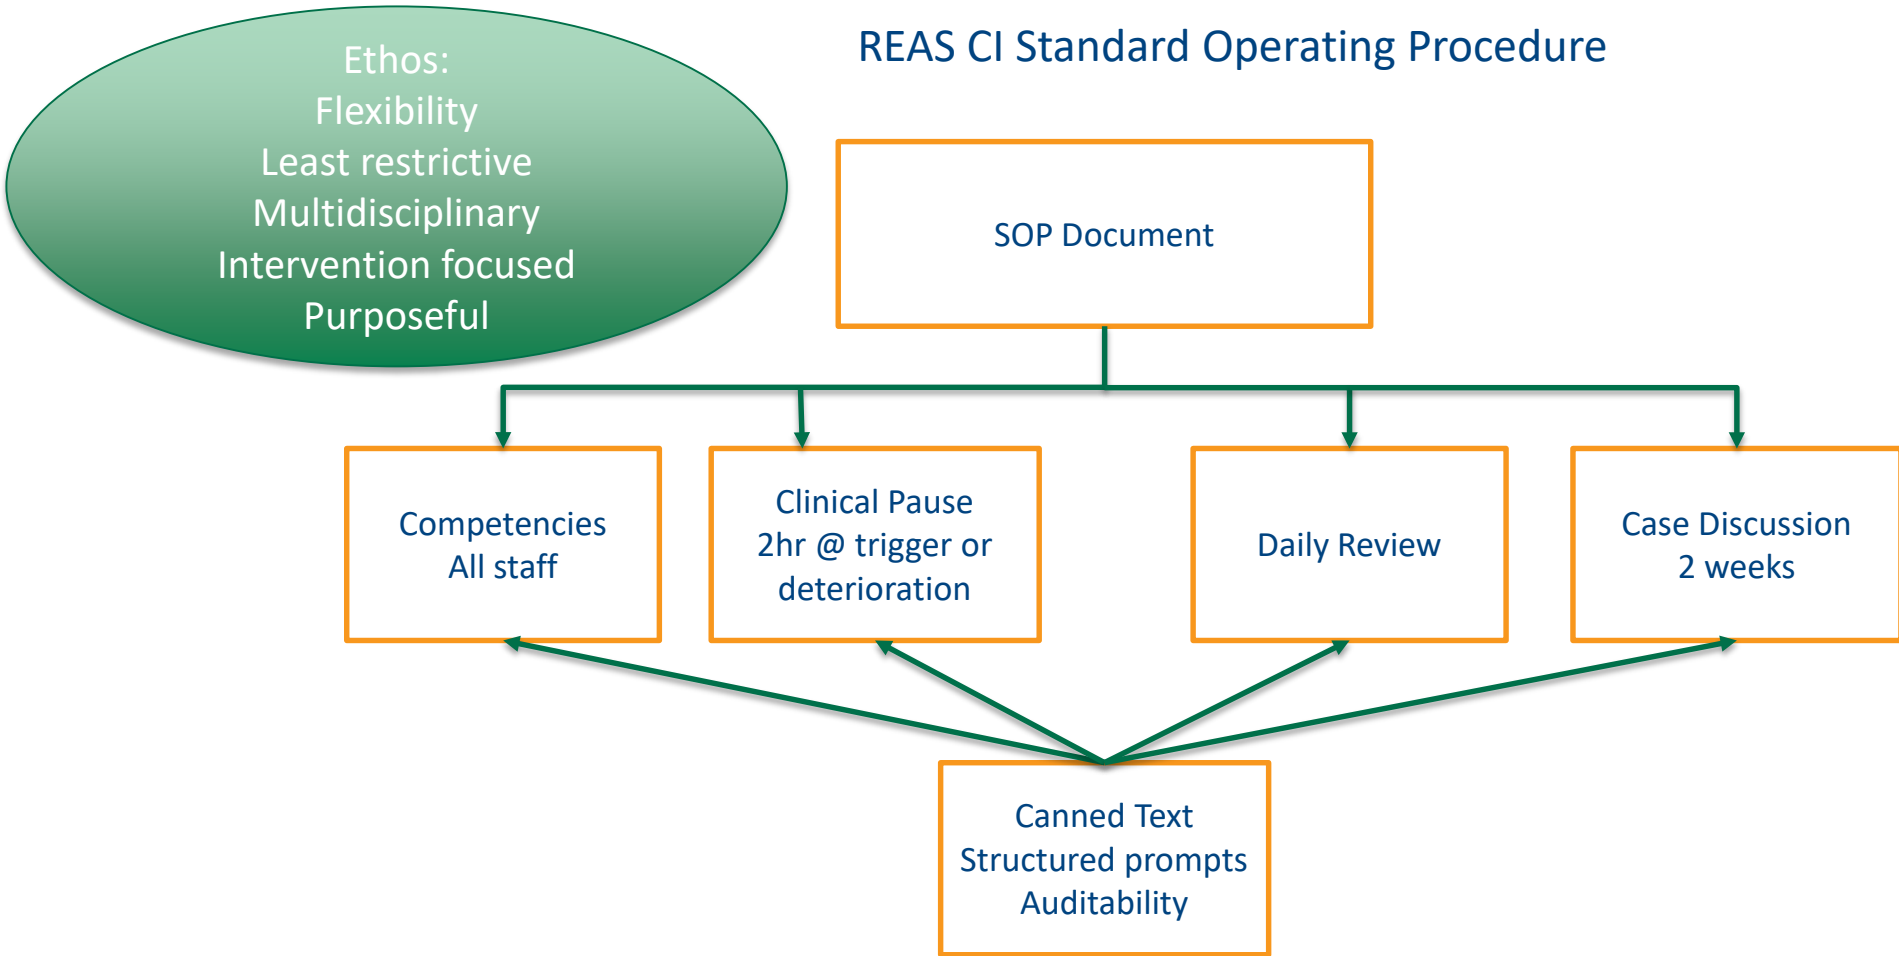

Competencies
All staff

Clinical Pause
2hr @ trigger or
deterioration

Daily Review

Case Discussion
2 weeks

Canned Text
Structured prompts
Auditability

- Challenge: small test of change or whole service implementation
- Early discussions about evaluation with stakeholders
- Build in method of evaluation/audit – create sustainability
- Focus efforts on defined processes e.g. Clinical Pause, Case Discussion, Competencies
- Use data to customise training and improve implementation

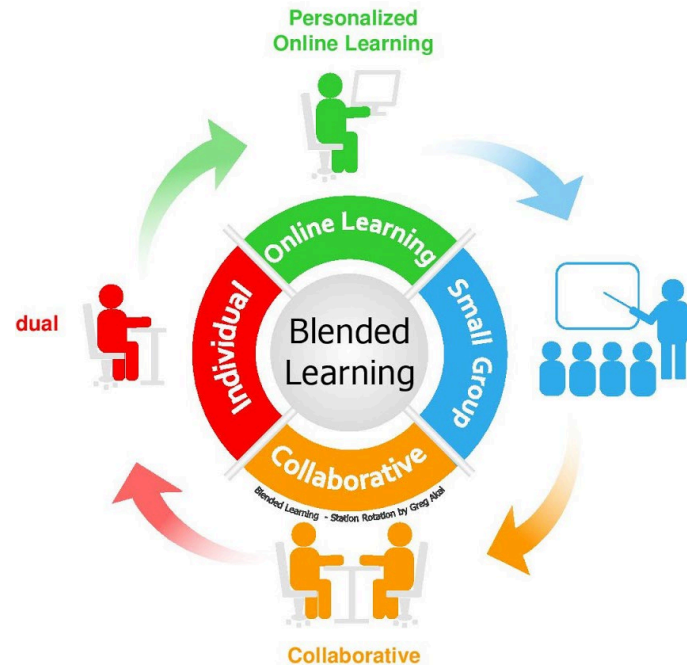

Spread

Healthcare
Improvement
Scotland

- Sharing learning nationally through HIS
- Sharing learning with MH areas outside REAS
- Spreading to non-mental health areas e.g. acute general hospitals
- Developing training modules

REAS Cumulative Nursing Competencies Completions Sept 2020 - Jan 2022

Royal Edinburgh and St John's Hospitals
Cumulative total number of clinical pauses
21 Sep 2020 -- 30 Jan 2022

REH - Reason for clinical pause

Continuous Intervention Days per Service Area				
Service	Total (days)	Range (days)	Number of CI's	Average days
Acute Adult	430	0-76	49	8.8
OPMH	140	1-60	16	8.8
Rehabilitation	134	5-55	6	22.3
Total	704	NA	71	9.9

REAS Mar – Aug 2021

Reason for Continuous intervention >14 days by Service Area						
Service	Disinhibition	Distress and agitation	Self-harm / suicidal ideation	Violence and aggression	Unpredictable	Total
Acute Adult	2	1	4	1	1	9
OPMH	0	0	0	2	0	2
Rehabilitation	0	1	0	2	0	3
Total (reason for CI)	2	2	4	5	1	14

REAS Mar – Aug 2021

Sustainability...

Healthcare
Improvement
Scotland

- Use data to understand system e.g. who, what, where, when, why
- Identify gaps
- Compare data with other data sources e.g. Datix, HEMPA
- Share improvement ideas
- Identify spin-off improvement projects
- Create conditions for change...

Simon Porter
Royal Edinburgh Hospital
Patient's Council
