Box Score Checklist

The box score enables teams to evidence improvements within their area. When developing and finalising a box score to use within your team, it is important to cover all the areas below. Use this checklist to see if you have any areas where you would want to further develop your box score.

Area	Yes/No	Action required
Measures cover a range of programmes (e.g., Excellence in Care, Scottish Patient Safety Programme, Access QI, Realistic Medicine)		
Contains measures on performance, capacity, and cost		
Data flows for each of the measures are established		
Measures are linked to organisational strategy and priorities		
Measures reflect quality improvement and quality control		
Capacity measures enable the team to monitor an increase in direct capacity		
Costs are variable and can be managed over time by the team		
Everyone in your value management team knows where to access your box score or who to get in touch with to do so
